NOTE 1 - Summary of Significant Accounting Policies

(A). Accounting Practices

The Accompanying financial statements of Municipal Mutual Insurance Company of West Virginia (Company) have been prepared on the basis of accounting prescribed by the West Virginia Insurance Department.

The State of West Virginia requires insurance companies domiciled in the State of West Virginia to prepare their statutory financial statements in accordance with the National Association of Insurance Commissioners (NAIC) *Accounting and Practices Procedure Manual* subject to any deviations prescribed or permitted by the West Virginia Insurance Department.

(B). Use of Estimates

The preparation of the financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue and expenses. It also requires estimates in the disclosure of contingent assets and liabilities. Actual results could differ from these estimates.

(C). Accounting Policies

Direct premiums are earned over the term of the related policy. All policies are written one year in length with different payment options (quarterly, semi-annual, annual). Unearned premiums are established to cover the unexpired portion of the direct premium written and any unbilled portion of the annual policy. Such reserves are computed by pro-rata methods of direct business. Expenses incurred in connection with acquiring new business such as commissions are charged to operations as incurred.

Net investment income consists primarily of bond interest, dividends on stock, interest on bank accounts, interest from mortgage loans and rent from occupying its own building. Bond interest is recorded on the accrual basis and dividends are recorded on ex-dividend basis. Bank interest, mortgage interest and rental income from the Company's building are recorded monthly to reflect actual income earned.

Real estate investments are classified on the balance sheet as properties occupied by the Company. These investments are carried at depreciated cost.

In addition, the Company uses the following accounting policies:

- (1). For the year ended December 31, 2015 the Company has one short-term investment recorded as cash. The investment is a 3-month Certificate of Deposit with a current interest rate of .50% and a face value of \$54,080. The maturity date is March 25, 2016;
- (2). Investment grade bonds not backed by other loans are stated at their amortized value. There are no non-investment grade bonds with NAIC designations of 3 through 6 held by the Company:
- (3). Common stocks are stated at their fair market value;
- (4). The Company has no preferred stocks;
- (5). First lien mortgages are stated at their unpaid principal balance less non-admitted amounts in excess of the allowable loan percentage of 66.67%. At year end the Company had two outstanding mortgage loans; one is current in principal/interest; the other is past due over 180 days in principal/interest in the amount of \$4,056/\$1,554 respectively.
- (6). U. S. Government agency loan-backed securities are valued at their amortized value;
- (7). Basis of valuation of subsidiary and affiliated companies not applicable;
- (8). Basis of valuation in joint ventures and partnerships not applicable;
- (9). Basis of valuation of derivatives not applicable;

- (10). Premium deficiency reserves not applicable;
- (11). Unpaid losses and loss adjustment reserve(LAE) include amounts from individual case estimates and loss reports and an amount based on past experience for losses incurred but not reported(IBNR). Such liabilities are necessarily based on assumptions and estimates and while management believes the amounts adequate, the ultimate liability may be in excess or less than the amounts provided. The methods for making such estimates and for establishing the resulting liability are continually reviewed and any adjustments are reflected in the period determined;
- (12). The Company's capitalization policy for purchases of items such as electronic data processing equipment, software, furniture, vehicles and other equipment have not changed from those of the prior year;
- (13). Not applicable as the Company does not write major medical insurance with prescription drug coverage.

NOTE 20 - Fair Value Measurements

(A). Inputs Used for Assets and Liabilities Measured and Reported at fair Value

1. Items measured and Reported at Fair Value by Levels 1, 2 and 3

The Company has categorized its assets and liabilities that are reported on the balance sheet at fair value into the three-level fair value hierarchy as reflected in the table below. The three-level fair value hierarchy is based on the degree of subjectivity inherent in the valuation method by which fair value was determined. The three levels are defined as follows.

Level 1 - Quoted Prices in Active Markets for Identical Assets and Liabilities

This category, for items measured at fair value on a recurring basis, includes exchange-traded preferred and common stocks. The estimated fair value of the equity securities within this category are based on quoted prices in active markets and are thus classified as Level 1.

Level 2 – Significant Other Observable Inputs

This category for items measured at fair value on a recurring basis includes bonds, preferred stocks and common stocks which are not exchange-traded. The estimated fair values of some of these items were determined by independent pricing services using observable inputs. Others were based on quotes from markets which were not considered actively traded.

Level 3 – Significant Unobservable Inputs

The Company has no assets or liabilities measured at fair value in this category.

Assets at Fair Value Level 1 Level 2

Common Stocks \$10,235,545

Bonds \$18,090,761

(2). Roll-forward of level 3 Items:

The Company has no assets or liabilities measured at fair value in the Level 3 category

(3). Policy on Transfers into and Out of Level 3

At the end of each reporting period, the Company evaluates whether or not any event has occurred or circumstances have changed that would cause an instrument to be transferred into or out of Level 3. During the current year, no transfers into or out of Level 3 were required.

(4). Input and Techniques Used for Level 2 and Level 3 Fair Values

The Company has no assets or liabilities measured at fair value in the Level 3 category.

Bonds carried at fair value categorized as Level 2 were valued using the market approach. These valuations were determined to be Level 2 valuations as quoted market prices for similar instruments in an active market were utilized.

- (5). Derivative Fair Values not applicable
- (B). Other Fair Value Discloses not applicable

(C). Fair Value for All Financial Instruments by Levels 1, 2 and 3

The table below reflects the fair values and admitted values of all admitted assets and liabilities that are financial instruments. The fair values are also categorized into three-level fair value hierarchy as described above in Note 20A. This was not practicable for mortgage loans as described below in Note 20D.

	Fair value	Admitted value	Level 1	level 2	not practical
Bonds	\$18,090,761	\$17,966,793		\$18,090,761	
Stocks	\$10,235,545	\$10,235,545	\$10,235,545	5	
Mortgage Loans	\$237,161	\$237,161			\$237,161
Cash	\$2,192,859	\$2,192,859	\$2,192,85	9	

(D). Financial Instruments for which Not Practical to Estimate Fair Values

It is not practical to determine the fair values of mortgage loans for purposes of the above disclosures of Note 20C due to the fact that these items are not traded and therefore quoted market prices are not available. Also, the cost of obtaining estimates of fair values from other sources is considered excessive given the immateriality of the mortgage loans.

- (B). Trouble Debt Restructuring for Debtors not applicable
- (C). Other Disclosures
